

Drill Rig Operator Program

I am reaching out to Contractors, Manufacturers and material and service providers to the Drilled Shaft Industry. The Western Canadian Chapter of the International Association of Foundation Drilling and Northern Alberta Institute of Technology (NAIT) have partnered to create an online accredited Drill Rig Operators program. This one of a kind program will assist companies to provide their junior operators with the knowledge and the skills to operate a foundation drill rig. To date the Western Canadian Chapter and NAIT have invested approximately \$20,000.00 to get to where we are today. We have completed the mapping process and have begun our search for investors.

We are currently at the program outline and curriculum stage. As you can well imagine, the cost of putting together the program is substantial. As an Industry we are very fortunate to have a partner such as NAIT that possess the skills and resources to put together a course of this quality and magnitude.

This project is very near and dear to my heart as I have grown up in the foundation drilling industry. I have made a successful career in this industry and made some truly remarkable friends. However, I have had an Uncle that was very seriously hurt and hear of injuries occurring every day. I believe that with the training that we will be providing, that it will assist us in the safe operation of foundation drilling equipment and will eliminate some of the injuries and even deaths that are happening on our sites today, Foundation drilling equipment used on today's projects are larger, more powerful, and technologically advanced than ever before. We **must** provide quality education and training.

This program will also provide your company with a one of a kind marketing opportunity. Depending on your level of contribution you will be listed as a founding contributor of the program. Your company's equipment, service or materials will be used in the development of curriculum, as well as your company will be included in all media that is used in the development and marketing of this program.

The time is now to step up, contribute and invest in, to help ensure sustainability in the future of the foundation drilling industry.

Please see below a link to a short Drill Rig Operator video and attached investor opportunity information.
