The mission of MGMA/Alabama is to advance the art and science of medical practice management to improve the health of our communities.

To manage, as defined by Webster's Dictionary, is "to exercise executive, administrative, and supervisory direction; to direct or carry on business." In today's changing healthcare environment, managing a productive medical practice is a complex task. A medical practice manager is unique in that a manager's duties often involve many areas of responsibility such as accounting, personnel, billing & collections, facility management, purchasing, and acting as the physician liaison, marketing director, and resident managed care expert. Who can help you successfully face these challenges...?
